Dear Brendan,

We wanted to tell you that the City of Mount Rainier is delighted with the Pavedrain system that you installed at our new municipal lot and an alley adjacent to the lot. We had issues with "stormwater" runoff and the Pavedrain has done a tremendous job of reducing runoff. Although it has only been in place for two months, it has retained all of the rainfall on it and also retains the runoff from adjoining properties.

We like the system so much that we just completed a grant application to have an additional 50,000 square feet of intersections and alleys done in Pavedrain. We look forward to doing more business with your company and its products in the near future.

Sincerely,

Mike Jackson
Assistant City Manager
