BRAIDED CORDS

YARNS

100% Polyester Cord

Engineering Specifications Sheet – 20 MM Revetment

January 14, 2010

Product Description

Diamond braided polyester filament cord braided over a polyester core

Diameter

1/4" or 0.25" +/- 3%

Tensile Strength

3700 lbs. to break average.

Construction

Percentage of total rope by weight:

Cover	30.8%
Core	69.2%
Coating	0%

Cover

Diamond braid construction, 16-carrier, 3-ply 1000 denier polyester filament per carrier.

Core

100% Polyester filament.

Coating

None.

Yield

41.3 ft/lb.
